

Coding Assignment 2

Objectives of this assignment:

- Gain familiarity in working in R notebooks.
- Review some beginning information about data types and data objects.
- Gain introduction to errors and use knowledge to diagnose problem.

The following code chunk assigns a vector to the object `run.times`.

```
run.times <- c(47.25,46.5,50.25,44.75,45.00)
```

What is the “data type” of `run.times`?

[TYPE YOUR ANSWER HERE, 1 PT]

What is the “data structure” of `run.times`?

[TYPE YOUR ANSWER HERE, 1 PT]

In the following code chunk, write a line of code that will return (i.e., display, print) the data structure?

```
# write the line of code below
```
