R Notebook #1: Introduction to R Notebooks and R Data Types and Structures

This is an R Markdown Notebook. When you execute code within the notebook, the results appear beneath the code.

Try executing this chunk by clicking the *Run* button within the chunk or by placing your cursor inside it and pressing *Cmd+Shift+Enter*.

```r
2+2
```

```
## [1] 4
```

Add a new chunk by clicking the *Insert Chunk* button on the toolbar or by pressing *Cmd+Option+I*.

When you save the notebook, a pdf file containing the code and output will be saved alongside it (click the *Preview* button or press *Cmd+Shift+K* to preview the pdf file).

The preview shows you a rendered pdf copy of the contents of the editor. Consequently, unlike *Knit*, *Preview* does not run any R code chunks. Instead, the output of the chunk when it was last run in the editor is displayed.
